## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

## **LISTING OF CLAIMS:**

- 1. (currently amended): A coating liquid for forming insulating film comprising (A) and (B), wherein a water content in the coating liquid is not more than 1% by weight:
- (A): a heat-reactive nonpolar compound or polymer thereof, wherein the heat-reactive nonpolar compound is selected from the group consisting of a compound having <u>not</u> less than two carbon-carbon double bonds, a compound having not less than two carbon-carbon triple bonds, and a compound having at least one carbon-carbon double bond and at least one carbon-carbon triple bond,
- (B): at least one compound selected from the group consisting of silane compounds represented by following formulae (1) to (3):

$$\begin{pmatrix}
R^{1} \\
R^{2}N - X \\
R^{2}
\end{pmatrix}_{n} - X + C - R^{4}$$

$$\begin{pmatrix}
R^{3} \\
C - R^{4}
\end{pmatrix}_{m}$$
(1)

(wherein, R<sup>1</sup> and R<sup>2</sup> independently represent hydrogen atoms, alkyl group having 1 to 4 carbon atoms or aryl group having 6 to 20 carbon atoms, R<sup>3</sup> represents alkyl group having 1 to 4 carbon atoms or aryl group that may be substituted with alkyl group having 1 to 3 carbon atoms, R<sup>4</sup> represents alkyl group having 1 to 4 carbon atoms, acyl group having 1 to 4 carbon atoms or aryl group having 6 to 20 carbon atoms, X represents bivalent group, n and m is integers of from 1 to 3, providing that n+m is not more than 4),

$$\begin{pmatrix}
R^{5} \\
6C = N - X
\end{pmatrix}_{n} - Si - \left(O - R^{4}\right)_{m}$$
(2)

(wherein, R<sup>3</sup>, R<sup>4</sup>, n and m are as defined above, R<sup>5</sup> and R<sup>6</sup> independently represent hydrogen atom ormonovalent organic group, providing that both R<sup>5</sup> and R<sup>6</sup> are not hydrogen atoms), and

$$\left(\begin{array}{c}
R^{7} \\
R^{7$$

(wherein, R<sup>3</sup>, R<sup>4</sup>, n and m are as defined above, R<sup>7</sup> represents alkylene group having 3 to 8 carbon atoms).

2. (original): A coating liquid according to claim 1, wherein the compound of formula(1) is a compound of formula (4):

3

 $(R^3, R^4, n \text{ and } m \text{ are as defined above}).$ 

- 3. (original): A coating liquid according to claim 1 or 2, wherein the compound of formula (4) is at least one selected from the group consisting of 2-aminoethyltrimethoxysilane, 2-aminoethyltriacetoxysilane, 3-aminopropyltrimethoxysilane, 3-aminopropyltriacetoxysilane, 2-aminoethyltriacetoxysilane, 3-aminopropyltriacetoxysilane.
- 4. (original): A coating liquid according to claim 1, wherein a compound of formula (2) or formula (3) is obtained by condensation of the compound of formula (4) with a compound of formula (5) or formula (6):

$$\begin{array}{c}
O \\
R^{5} & || \\
C - R^{6}
\end{array}$$

(wherein, R<sup>5</sup> and R<sup>6</sup> are as defined above), and

(wherein, R<sup>7</sup> is as defined above).

- 5. (original): A coating liquid according to claim 4, wherein the compound of formula(5) or formula (6) is a compound with boiling point not more than 250°C under atmospheric pressure.
- 6. (original): A coating liquid according to claim 4, wherein the compound of formula (5) is at least one selected from the group consisting of methylethylketone, 2-butanone, 2-pentanone, 3-pentanone, methylbutylketone, methylisobutylketone, 2-heptanone, 3-heptanone, acetylacetone.
- 7. (original): The coating liquid according to claim 1, wherein the amount of (B) is from 0.01 to 10% by weight to (A).
- 8. (original): A coating liquid according to claim 1, wherein (A) is a heat-reactive nonpolar compound having adamantane skeleton or a polymer of the heat-reactive nonpolar compound having adamantane skeleton.
- 9. (original): A coating liquid according to claim 8, wherein (A) is a compound of formula (7) or a polymer of the compound of formula (7):

(wherein, Ar represents a group having an aromatic ring, R<sup>8</sup> represents a group represented by formula (8) or formula (9), x represents an integer of from 1 to 3, wherein, when x is not less

than 2,  $R^8$  may be same or different, y represents an integer of from 1 to 3, wherein, when y is not less than 2, Ar and  $R^8$  may be same or different,  $x \times y$  is an integer of from 2 to 9),

$$\frac{Q^{1}}{C} = C Q^{2}$$
(8)

(wherein, each of Q<sup>1</sup> to Q<sup>3</sup> independently represents hydrogen atom, alkyl group having 1 to 4 carbon atoms, alkenyl group having 2 to 4 carbon atoms, alkynyl group having 2 to 4 carbon atoms, or phenyl group), and

$$---c = c - Q^4$$

(wherein, Q<sup>4</sup> represents hydrogen atom, alkyl group having 1 to 4 carbon atoms, alkenyl group having 2 to 4 carbon atoms, alkynyl group having 2 to 4 carbon atoms, or phenyl group).

- 10. (original): A coating liquid according to claim 9, wherein the compound of formula (7) is a compound having Ar that bonds to methine group of adamantane skeleton.
- 11. (original): A coating liquid according to claim 9 or 10, wherein R<sup>8</sup> is a group of formula (9).
- 12. (original): A coating liquid according to claim 9, wherein R<sup>8</sup> is ethynyl group or phenylethynyl group.

- 13. (original): A method for forming an insulating film comprising coating a substrate with the coating liquid according to claim 1, baking at 80 to 250°C under atmospheric pressure in air, and heat-curing at 250 to 400°C.
- 14. (original): An insulating film obtained by the method for forming according to claim13.
